TEXAS LANDS. - The Texas Legislature has just passed a bill opening almost the whole domain of the State to sale at fixed prices The commissioner of the land office is authorized to sell land scrip for tracts of 160, 320, 640 and 1.280 acres. The lands in the Pacific Reserve to be sold at \$2 per acre, the alternate sections being railroad and Galveston canal grants; and lands on all the islands at \$1 25 per acre, and all other public lands at \$1 00.

"THE BALMORAL." -- An Epigram-Clancy's Leader, a sprightly weekly journal of New York, places before the public the following epigram on "dyed garments," which has been circulating in the "society of the select" in that city for some time :

Homes of the Poets .- The house in which Moore was born is now a whisky shop; Burns' native cottage is a public house. Shelley's house, at Great Marlow, is a beer shop. The spot where Scott was born is occupied by a building used for a similar purpose; and even Coleridge's residence, at Neither Stowey, the sweet "Ode to the Nightingale" is now an ordinary beer house. A house in which James Montgomery lived for forty years, at Sheffield, is a beer shop.

We think is hardly known even to the most inelligent of our readers, how deep some of the sciences are looking down into the mysteries of creation. We knew there were wonderful discoveries in these times, and wonderful uses made of them, but did not know the Chemists were limitating in their crucibles and even surpassing the most wonderful productions of organic life. During our visit to Lowell we were introfuced by one of their prominent citizens to the laborstory of Dr. Ayer, (inventor of Cherry Pectoral and Cathartic Pills,) where we were shown with generous frankness his processes and his products. This muser genius of his art is manufacturing the subtle essenes of flowers from tar and other vegetable substances His essence of Pine Apple, Strawberry, Checkerberry Quince, Pear, Canella, Cinnamon, &c., not only equal but they exceed in purity of flavor, those vegetables hemselves. His oil of Winter-green is purer and of better flavor than any that can be gathered from the plant-and yet is made by chemical composition from the Hydro-carbons in tar! His process is, to analyze the substance and find the exact ultimate atoms of which it is made, then recompose them in the same proportions which exist in nature.-Christian Adro
